

Working with our binaries		
GROUP:		
test	subtest	points
Checkpoint-3		/15
Compile		/5
Run group binaries		/20
Our client - group AS, AP	Normal operation	/25
	Send Wrong IP to server	/5
	Send Wrong ID to server	
Our AS - group client, AP	Normal Operation	/5
	return outdated timestamp	/5
Our server - group AS, client	Normal Operation	/10
	Wrong nonce reply	/5
	Wrong file hash	/5
	TOTAL	/100

Special test - If Not working with our binaries	
CLIENT	print session key
points obtained at this section are reflected above at "Our client - group AS, AP"	Check if key is compliant with DES
	Server prints CLIENT_ID
	change session key to a wrong key
	change client IP address to wrong
	change client ID to wrong
AS	change code to return outdated timestamp
	print session key
points obtained at this section are reflected above at "Our AS - group client, AP"	
SERVER	Don't do +1
points obtained at this section are reflected above at "Our server - group AS, client"	wrong hash
	print ts+1 at server, show encrypting
	print session key
